CSPR Section III: Written Project Information Part I

1. Name of on-site, adjacent or downstream wetlands or waterbodies:						
Identify and describe the existing land use on and adjacer significant features of the project site:	nt to the sit	e. Include a	any existing stru	uctures or		
3. Identify the coastal resources and associated policies that apply to the project by placing a check mark in the appropriate box(es) in the following table. Show all indicated coastal resources on the site plan.						
Coastal Resources	On-site	Adjacent	Off-site but within influence of project	Not Applicable		
General Coastal Resources* - Definition: CGS Section 22a-93(7); Policy: CGS Section 22a-92(a)(2)		\boxtimes				
Beaches & Dunes - Definition: CGS Section 22a-93(7)(C); Policies: CGS Sections 22a-92-(b)(2)(C) and 22a-92(c)(1)(K)						
Bluffs & Escarpments - Definition: CGS Section 22a-93(7)(A); Policy: CGS Section 22a-92(b)(2)(A)						
Coastal Hazard Area - Definition: CGS Section 22a-93(7)(H); Policies: CGS Sections 22a-92(a)(2), 22a-92(a)(5), 22a-92(b)(2)(F), 22a-92(b)(2)(J), and 22a-92(c)(2)(B)						
Coastal Waters, Estuarine Embayments, Nearshore Waters, Offshore Waters – Definition: CGS Sections 22a-93(5), 22a-93(7)(G), and 22a-93(7)(K), and 22a-93(7)(respectively; Policies: CGS Sections 22a-92(a)(2) and 22a-92(c)(2)(A)	(L)					
Developed Shorefront - Definition: CGS Section 22a-93(7)(I); Policy: 22a-92(b)(2)(G)						
Freshwater Wetlands and Watercourses - Definition: CGS Section 22a-93(7)(F); Policy: CGS Section 22a-92(a)(2)						
Intertidal Flats - Definition: CGS Section 22a-93(7)(D); Policies: 22a-92(b)(2)(D) and 22a-92(c)(1)(K)						
Islands - Definition: CGS Section 22a-93(7)(J); Policy: CGS Section 22a-92(b)(2)(H)						
Rocky Shorefront - Definition: CGS Section 22a-93(7)(B); Policy: CGS Section 22a-92(b)(2)(B)						
Shellfish Concentration Areas - Definition: CGS Section 22a-93(7)(N); Policy: CGS Section 22a-92(c)(1)(I)						
Shorelands - Definition: CGS Section 22a-93(7)(M); Policy: CGS Section 22a-92(b)(2)(I)						
Tidal Wetlands - Definition: CGS Section 22a-93(7)(E); Policies: CGS Sections 22a-92(a)(2), 22a-92(b)(2)(E), and 22a-92(c)(1)(B)						
* General Coastal Resource policy is applicable to all proposed activities.						
 Check the appropriate box below to indicate whether the more total acres of land area, including all phases (pl stormwater best management practices): Project or activity will disturb 5 or more total acres 	lease also	see Part I	I.B. regarding	proposed		

registration for the DEEP General Permit for the Discharge of Stormwater and Dewatering Wastewaters Associated with Construction Activities Project or activity will disturb between 1 and 5 total acres of land area on the site and discharges to the municipal separate storm sewer system or directly to the waters of the state, and may be subject to municipal stormwater management plan review and approval Project or activity will not disturb mor than one total acre of land area and is not part of a larger common plan of development or sale that would disturb one acre or more Other (describe)
Part II.A.: Description of Proposed Project or Activity Describe the proposed project or activity including its purpose and related activities such as site clearing, grading, filling, demolition, and other site preparations; percentage of increase or decrease in impervious cover over existing conditions resulting from the project; phasing, timing and method of proposed construction; and new uses and changes from existing uses (attach additional pages if necessary or indicate if this information has been included in Item 12 above):
Part II.B.: Description of Proposed Stormwater Best Management Practices Describe the stormwater best management practices that will be utilized to ensure that construction-related and post-construction stormwater will be adequately treated and managed. Identify how these stormwater controls are consistent with the 2004 Connecticut Stormwater Quality Manual and address any stormwater-related water quality impairments identified in Part I. If the site or stormwater discharge is adjacent to tidal or inland wetlands or watercourses, describe how the volume of runoff generated by the first inch of rainfall, or any portion thereof, will be retained on-site. If runoff cannot be retained on-site, describe the site limitations that prevent such retention and identify how stormwater will be treated before it is discharged from the site. Also demonstrate that the loadings of total suspended solids from the site will be reduced by 80 percent on an average annual basis, and that post-development stormwater runoff rates and volumes will not exceed pre-development runoff rates and volumes (attach additional pages if necessary):
Part II.C.: Description of Proposed Soil Erosion and Sediment Controls Describe the soil erosion and sediment controls that will be utilized to ensure that on- and off-site resources and watercourses will not be adversely affected by sedimentation or soil erosion from the site during construction. Identify how these controls are consistent with the Guidelines for Soil Erosion and Sediment Control and address any erosion and sedimentation-related water quality impairments identified in Part I. Identify by name and telephone number the individual responsible for maintenance of soil erosion and sediment controls for the duration of the project (attach additional pages if necessary):

Part II.D.: Description of Proposed Septic System

Describe the proposed septic system and how its design conforms to the Connecticut Public Health Code and the Regulations and Technical Standards for Subsurface Sewage Disposal Systems. Please attach any approvals already obtained. Describe how design of the septic system and its location on the subject site will not adversely impact on- and off-site resources and watercourses during installation or system operation (including additional water quality impairments); adverse impacts to coastal waters from nitrogen; and flood

immediate vicinity of the proposed location of the septic system and how they are adequate accommodate a system (attach additional pages if necessary):		
Part III: Consistency with Applicable Zoning Regulations and Municipal Plan of Conservation as Development Explain how the proposed activity or use is consistent with all of the applicable regulations and policic contained in the municipal zoning regulations and Plan of Conservation and Development (attach addition pages if necessary):		
Part IV: Mitigation of Potential Adverse Impacts Explain how all potential adverse impacts on resources such as wetlands and watercourses have been avoided, minimized, or mitigated (attach additional pages if necessary):		
Part V: Remaining Adverse Impacts Explain why any remaining adverse impacts resulting from the proposed activity or use have not be mitigated (attach additional pages if necessary)		
By signing this application, the applicant acknowledges that he/she understands that it is the applicant responsibility to conform to the Borough of Fenwick's Zoning Regulations and that if the information he provided proves to be false, incomplete, and/or inaccurate, the permit will be revoked. Further, by signification, the applicant consents to access to the premises, at reasonable times, by appropria officials of the Borough of Fenwick for the purpose of evaluating this application prior to its approval inspections to monitor compliance of any work performed pursuant to any approval of this application; and continuing compliance inspections and monitoring following completion of any work authorized by supproval.		
Signature of Owner/Applicant: Date:		
his/her agent in making this application.)		

Plan Checklist

	ase provide project site plans that clearly and accurately depict the following information, and check the appropriate ses to indicate that the items are shown on the plans included in this application:
	Project location
	Existing conditions, including resources, contours, buildings, and grading
	Proposed conditions, including resources, contours, buildings, and grading
	Soil erosion and sediment controls
	Septic system location, if applicable
$\overline{\Box}$	Ownership and type of use on adjacent properties
	Reference datum (i.e., National Geodetic Vertical Datum, Mean Sea Level, etc.)
Thi	s application form shall be accompanied by, in writing, the following:
	An original Proposed Plan , signed and stamped by the originator, with a scale of one (1) inch equals twenty (20) feet, showing the tax map, lot number or numbers of the land to which such application relates, and clearly disclosing the following information:
	All revision dates and necessary definitions and legends, and the true scale of the survey, in which one inch (1") shall be equal to no more than twenty feet (20').
	The direction of true north.
	The actual shape and dimensions of the lot to be used.
	The exact size and location on the lot of existing and proposed buildings and structures, with all mechanical and electrical appurtenances, including generators, heat pumps, and air conditioning units; utilities; septic system areas; wells; driveways and parking areas; and drainage facilities.
	☐ The location of all required setbacks or yard lines, and of all easements.
	A computation of lot and building coverage with indication of how it was computed.
	Topographic contours at an interval no greater than five feet and indication of the datum on which the elevations were based.
	Watercourses, inland wetlands and tidal wetlands, tidal marshes, floodprone and flood hazard areas, and any proposed alterations or encroachments into such areas.
	The location and name of all streets, roads, or highways that pass through or adjoin the lot or, if no such street, road, or highway passes through or adjoins the lot, the entire route of vehicular access to the lot from such a street, road, or highway.
	A detailed plan for erosion and sedimentation control covering all proposed work, which shall indicate measures taken to control erosion and sedimentation both during and after construction.
	A list, keyed to the Proposed Plan, of the names and addresses of the record owners of abutting land, and land directly across any roadway from the land to which the application relates.
	If subsurface sewage disposal facilities or wells must be constructed or altered for the proposed use pursuant to the Public Health Code or other applicable requirements, the applicant must provide written proof that all such requirements will be or have been met.
	An A-2 survey by a licensed, registered land surveyor of the State of Connecticut, showing the locations of the structure or structure's foundation with reference to all front, side, and rear setbacks at the time any new foundation is constructed. All required documentation, such as Plans, As-Builts, and Architectural Drawings, must be sealed with original signatures, for property within
	For property wholly or partially within a Special Flood Hazard Area, the ADDENDUM TO ZONING PERMIT FOR CONSTRUCTION WITHIN A SPECIAL FLOOD HAZARD AREA must be completed and attached.
